Koen van Eijk

Principal AI Architect

ABOUT

My journey began with founding Automagica (acquired by Netcall) and has evolved to the cutting edge of agentic AI, where I design multi-agent systems that deliver sophisticated, goal-oriented automation.

CORE COMPETENCIES

- **Agentic AI Systems:** RAG, LangChain, Multi-Agent Collaboration, Reasoning Loops.
- **Enterprise Automation:** System Architecture, Technical Leadership, Post-Acquisition Integration.
- **Cloud & Scalability:** Python, Kubernetes, AWS, GCP, Azure, Productionization.

CAREER HIGHLIGHTS

Co-Founder
Patgrid (2024-Present)

RPA Solution Engineer
Netcall (2020-2023)

Co-Founder (Acquired)
Automagica (2018-2020)

Technology Advisor
KPMG Belgium (2015-2017)

Is Your Business Ready for an AI Upgrade?

- Struggling to scale a manual, repetitive business process?
- Overwhelmed by data your team can't analyze effectively?
- Losing a competitive edge to more tech-savvy rivals?
- Looking to unlock new revenue streams through automation?

The Kickstarter

A fixed-price engagement to deploy a custom AI agent in 3-4 weeks, focused on solving a specific, high-value business challenge.

1. AI Opportunity Roadmap Session

We'll work with your key stakeholders in a paid 90-minute deep dive to identify the highest-impact use case and co-design a blueprint for your agent. Fee is credited to the project.

- **Key Deliverable:** A tangible plan of action & agent blueprint.

2. Custom Agent Development

I personally build the full solution using enterprise-grade architecture. You'll receive regular progress updates to ensure full alignment and transparency.

- **Key Deliverable:** A fully functional, custom-built AI agent.

3. Deployment & Handover

I deploy the agent into your workflow and provide a dedicated session to train your team, ensuring they are confident and capable of managing the agent.

- **Key Deliverable:** Deployed agent & complete documentation.

"Koen's technical acumen... and professionalism made substantial and lasting contributions. His expertise was critical in the seamless integration of his technology into our enterprise platform after the acquisition."

Richard Billington, CTO, Netcall

> *"This is a fundamental shift from simple assistants to autonomous systems that can take on entire roles... The future is being built today, one automated workflow at a time."*
>
> **Peter Van den Spiegel**, Partner, KPMG

Select Case Studies

IP Firm Patent Analysis
Reduced a 40-hour manual review to under 10 hours by architecting a multi-agent research system, increasing analyst capacity by 75%.

Automated Legal Data Redaction
Eliminated human error in compliance workflows by engineering an AI platform to automatically redact sensitive legal data.

Open-Source Agent Framework
Accelerated development for AI engineers by building a foundational open-source library (agentpipe) for creating complex agents.

On-Device Activity Recall
Addressed market privacy concerns by creating an open-source, on-device alternative to Windows Recall (OpenRecall).

Who is the Kickstarter for?

- Businesses with a defined, high-value process ripe for automation.
- Leaders who need to prove AI value with a quick, impactful win.
- Companies with internal data and systems ready for integration.

Beyond the Kickstarter

- **Ongoing Support:** Retainers for maintenance, monitoring, and optimization.
- **Scaling the Solution:** A roadmap to expand agent capabilities across the business.
- **Strategic AI Advisory:** Partnership to identify new automation opportunities.

What Industry Leaders Say

PE

"An adaptable and highly-driven individual with a practical approach... He always gets the job done."

Paul-Emmanuel Tasiaux, Principal, BCG

JV

"...very good and passionate about what he does... very skilled in making the complex more simple."

Jorrit van den Berg, Ops Manager, Tesla
